

Day 1

If we are able to divide vertices of a graph into 2 mutually exclusive and exhaustive set, such that all edges are across set, the graph is said to be bipartite

Def 2

Cyclewise \rightarrow Even Cycle
Odd Cycle \times

pg 3

if I am able to color the nodes of graph with 2 colors such that neighbours are not having the same color

DFS
BFS

1 \Rightarrow Blue
0 \Rightarrow colorless
-1 \Rightarrow red

$$\text{Vis: } \frac{1}{0} \frac{-1}{1} \frac{1}{2} \frac{-1}{3} \frac{2}{4} \frac{-1}{5} \frac{-1}{6}$$

⑥

5

3

Topological sorted order

DAG

Kahn's algo

i) Calculating dependencies

ii) which (sm1 unvisited)

choose 0 depen
do work
reduce dep of its nbr

26 1 3 5 4

Kahn's also

i) Calculate integrals

ii) Add integer $= 0$ into Q

iii) star BFS

[1 2 6 5 3 4]

$$\ln(x) = \frac{0}{1} - \frac{1}{2} + \frac{1}{3} - \frac{1}{4} + \frac{1}{5}$$

PPL having index = 0

- Remove
- ~~Mass~~
- work
- Add New

$$\begin{bmatrix} 3 & 1 & 0 \\ 5 & 1 & 0 \end{bmatrix}$$
